

# A Customer-centric, Innovative, and Reliable CDMO with Global Solutions

OEB 1 to 5, Sub-g to Metric-ton Scale, Pre-clinical to Commercial.

Small Molecules

Tides

Biologics & Conjugates

# Porton Slovenia

DS R&D and GMP Manufacturing Solution for Global Customers

## B31 (1,000 sqm) R&D and Kilo Lab

In Operation

- International Team of Experts with Broad Experience in Small Molecules APIs
- Two R&D Teams Already on board, Along with Support Functions (9 FTE/each)
- OEB 4 ( $\geq 1 \mu\text{g}/\text{m}^3$ )
- 4 Process Labs, 6 Analytical Labs and Support/Storage Rooms
- Reactors Volume in Kilo Lab Suite from 20 L to 50 L, in GL & SS & HC
- Kilo Lab in GMP Condition with Isolation in Clean Room ISO 8

## B30 (6,840 sqm) Pilot Plant

Start-up from Q1 2026

- 5 GMP Reaction Trains with Isolation in Clean Room ISO 8 — 20.5 m<sup>3</sup> Total Capacity
- Reactors Volume from 250 L to 3,000 L in GL & SS & HC with Solid Material Loading and Discharging in Isolator
- OEB 4 ( $\geq 1 \mu\text{g}/\text{m}^3$ )
- QC Lab
- Process Safety Lab
- 6 R&D Teams (9 FTE/each)
- 9 Process Labs and 8 Analytical Labs

## B34 (900 sqm) GMP Warehouse

Start-up from Q1 2025

- GMP Warehouse for Raw Materials (liquid and solid), Intermediates, Final Products and Packaging Materials

## B78 (9,200 sqm) Commercial Plant

Under Planning

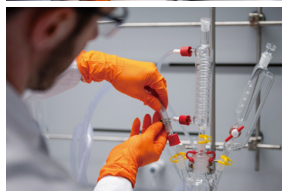

An Integrated and Production-oriented R&D team, driven by the right-first-time philosophy at scale, features a process scale-up expert, chemical engineer, and analytical chemist.

## R&D Capabilities

---

- Pressure Reactions (hydrogenation, carbonylation, etc.)
- Cryogenic to High Temperature Reactions (-80 to 200°C)
- Enzymatic Reactions, Biocatalysis
- Organometallic Chemistry (Grignard, etc.)
- Protective Groups Handling
- Homogeneous & Heterogeneous Catalysis
- Precious Metals Catalysis (cross-couplings, etc.)
- Special/Hazardous Reagents (borane, cyanides, dimethyl sulfate, chlorine, bromine, triphosgene, etc.)
- Stereoselective Synthesis & Chiral Resolution
